

FINANCIAL REPORTING & ANALYSIS

20 CPD UNITS

COURSE DETAILS

The need to offer the program arose after realizing the great difficulties faced by professionals in the field of implementing good practices in the field of Financial Reporting and Analysis and more specifically to be able to analyze and interpret the results of financial statements of companies in order to be able to perform high quality analyzes that take into account recent developments regarding International Financial Reporting Standards (IFRS) as well as US Generally Accepted Accounting Practices and the adoption of well-informed investment decisions.

The module aims to provide delegates with a thorough understanding of the financial accounting techniques at an advanced level and gain an appreciation of the regulatory and social environment within which financial reporting takes place. They will also be able to analyze corporate financial statement information and to make performance evaluations and investment decisions.

TARGET GROUP

This course has been designed for professionals interested in understanding, analyzing, and using financial reports, including, but not limited to, finance and accounting professionals, financial analysts and engineers, as well as people working within banks, sales, procurement, contracts, credit risk, public relations management, and those engaged in speculative trading in shares and securities. In general, the most beneficiaries of this course are those who have limited experience of accounting and financial analysis and wish to enrich their knowledge and skillset.
