

Virtual Live Seminar

Digital Upskilling Academy - Data Analytics and Visualization

PwC's Academy Cyprus

The ability to organize, analyse and visualize data in order to extract actionable answers has now become a **key business skill** in most organisations and skilled data analysts are currently some of the most sought-after professionals in the world. This course introduces professionals to important concepts and practical skills around data preparation, processing and visualization via state-of-the art tools, equipping them for the new era of professional work.

Who should attend the seminar?

The programme is addressed to employees or individuals across any industry who aim to increase their data literacy and solve business problems with market-leading data analytics and business intelligence tools such as Alteryx and Power BI. No prior knowledge of Data Analytics concepts or knowledge of the aforesaid tools is required for attending the program.
